The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director Division of Water Room W264 402 West Washington Street Indianapolis, Indiana 46204

For a petition to be considered valid it must:

- 1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
- 2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
- 3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
- 4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water Room W264 402 West Washington Street Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Application # : FW-22422

Stream : Turkey Creek

Applicant : Lake County Parks and Recreation

Craig Zandstra

Assistant Superintendent 8411 East Lincoln Highway Crown Point, IN 46307-8825

Description

: A new bridge will be constructed over Turkey Creek to carry golf carts and pedestrian traffic across the stream. The new structure will be a single-span steel framed bridge with a wood deck. The structure will have an out-to-out length of 80 feet and a clear roadway width of 6.5 feet. An existing bridge (golf cart bridge # 4) will be removed. The proposed project also includes the excavation of a one acre irrigation pond along the left overbank of Turkey Creek and construction of the 17th hole fairway bluff. Significant construction has begun on the irrigation pond and 17th hole fairway bluff. The irrigation pond ranges in depth from an emergent plant shelf to a maximum depth of 15 feet. The bluff covers a 150 foot by 80 foot area with an average height of 2 feet. The fill gradually slopes at a 10:1 slope back to grade. Excess material has been transported off site. There are also 10 existing golf cart bridges along Turkey Creek that were constructed prior to this construction project. The golf cart bridges have various lengths and widths. Fill was added to some of the existing bridges while being constructed. Details of the project are contained in information and plans received at the Division of Water on June 20, 2003.

Location

Beginning at the upstream side of the Grand Trunk Western railroad crossing over Turkey Creek and continuing upstream for approximately 7000' DOWNSTREAM: near Merrillville, Ross Township, Lake County

Applicant : *Indiana Department of Natural Resources

Dale Gick

Division of Water

402 West Washington Street, Room W264

Indianapolis, IN 46204-2641

Description : An existing deteriorated levee will be removed and replaced by a new 750' long

levee, which will extend from the lake's existing control structure on the ditch. The proposed structure will have a crest height of 2' above the legal lake level of 827.75', NGVD29, and a maximum height above land of less than 7'; a crest width of approximately 10' with 3:1 side slopes. The structure's core and base will consist of cellular concrete with side slopes of compacted fill from a borrow pit on the adjacent western property. Approximately 300' of the proposed levee will be constructed in a forested wetland. Approximately 12 to 17 acres of the property will become restored wetland. In addition, a berm will be constructed along the western property line to provide surface water separation for the adjacent property. Details of the project are contained in information and plans

received at the Division of Water on June 30, 2003.

Location : Extends approximately 1000' upstream (north) and west of the confluence with

Stream : Unnamed Tributary Salt

Fork

Applicant : David and Mary Fay

3205 Sneakville Road

Lawrenceburg, IN 47025-8796

Description : A new culvert crossing over an unnamed tributary of Salt Fork has been

constructed for service to a private property owner. The new structure has (2) 36"

corrugated PCV culvert, not larger than 20' spans. Earth fill was placed over the

top to a height not greater than 5'. The side slopes on the upstream and

downstream faces do not exceed 2:1. Additional fill was used to fill any voids in and around the culverts and at both ends of the bridge. The entire structure was

capped by 4" of asphalt concrete placed on top. Details of the project are contained in information and plans received at the Division of Water on July 1,

2003.

Location : Approximately 2,750' upstream of the confluence of Salt Fork

DOWNSTREAM: near Logan, Miller Township, Dearborn County SW¼, SW¼, SE¼, Section 33, T 7N, R 1W, Guilford Quadrangle

Lake : J C Murphey Lake

Applicant : Willow Slough Fish & Wildlife Area

David Spitznagle 2042 South 500 West Morocco, IN 47963-8048

Description : Sediment will be removed from approximately 7 miles of existing ditches

throughout the lake, all tying into Riner Houseworth Ditch, in order to drain the lake to restore its productivity. The sediment will be removed using excavators, bulldozers, and dragline from one side of the ditches. The spoil material will be spread evenly on one of the ditch's banks, at a maximum distance from the channel. The spoil banks will be reseeded to control erosion and inundated with 2'-5' of water at normal pool elevation. Details of the project are contained in information and plans received at the Division of Water on July 2, 2003.
